

Restoration Tile and Grout Cleaner (D405)

For restoration cleaning of tile and grout

FOR PROFESSIONAL USE ONLY

Removes embedded soil and mineral deposits when traditional tile cleaning has failed

APPLICATION: Hard Surface Care, Restoration Cleaning

DESCRIPTION

When normal cleaning procedures are not enough, then you have to get tough – and Restoration Tile and Grout Cleaner does the job! This industrial strength acid cleaner will remove embedded mineral deposits and carbonaceous soils such as rust, calcium, urine stains, soap scum, grout haze and efflorescence from manufactured tile and cement grout by removing a super fine layer, leaving your grout sparkling bright and clean. Advanced formulation with premium chemistry and corrosion inhibitors. Not recommended for use on most natural stone.

FEATURES

- Effective acid cleaner for tile and grout
- Removes embedded soil, mineral deposits, and hard water scale from grout.
- Safer and more powerful than other traditional acids.

WHERE TO USE

For use on ceramic tile, stone and grout with embedded soil or mineral build-up. Do not use on marble, limestone and other acid-sensitive surfaces – always pre-test first. Keep away from metal surfaces, especially chrome or other bright metal surfaces.

USE DILUTION: 8 to 32 oz./gal.

USE DIRECTIONS:

Pre-test: Pre-test process in an inconspicuous location. Check for weakened or damaged grout which may be affected by high pressure cleaning.

Mixing:

Light soil: 8 oz./gal.
Medium soil: 16 oz./gal.
Heavy soil: 32 oz./gal.

1. Sweep or vacuum to remove dust and loose soil.
2. Apply product with a coarse spray or a mop, allow up to ten minutes dwell time. Agitate with a brush if needed. Avoid overspray on appliances, walls, carpet or furnishings. Keep away from metal surfaces.
3. Clean using hard surface cleaning tools, using clear water or Professional Tile and Grout Cleaner (D456).
4. Pick up any remaining water with extraction tool or clean terry towels. Dry before allowing traffic.
5. Water-Based Tile and Grout Sealer (B462) is recommended after grout is dry.

COVERAGE: Makes up to 17 ready-to-use gallons. One gallon of ready-to-use solution will clean approximately 200 - 400 square feet, depending on soil level, tile type and width of grout lines.

USAGE TIPS:

- CAUTION: Floor is slippery when wet.
- Works great in restoration situations – porous grout with embedded soil, efflorescence, salt and mineral buildup, hard water buildup, other acid-cleanable soils.
- Not recommended for use on most natural stone or any surface that will be damaged by acid.
- Avoid overspray on appliances, walls, carpet or furniture.
- Keep away from metal surfaces, especially plated or bright metals. Wipe off overspray immediately. Dark marks from overspray can usually be buffed out with abrasive cleanser.
- Protect cleaned surfaces with Water-Based Tile and Grout Sealer (B462) after grout is dry.
