

# Spot and Stain Kit User's Guide

## GENERAL SPOTTING INSTRUCTIONS:

- For dye stains: Attempt normal cleaning procedures on spots and stains before attempting spot removal.
- Pre-treat pigment stains prior to cleaning.
- Pre-test all products in an inconspicuous area for colorfastness and fabric stability before use.
- Scrape off excess with plastic utensil or spotting spatula.
- Do not apply directly to carpeting or upholstery. Apply product to a towel, then daub on to spot or stain.
- Allow product to dwell on surface for 5–15 minutes, then blot. Do not rub; rubbing can cause damage to fibers.
- For large spots, work from the outside toward the center.
- Rinse extract the area if extraction equipment is available.
- Establish good drying conditions.

Reorder Number	Product name / Description	Type of spot
PSLCS	<b>Professional Spot Lifter.</b> General purpose spotter fortified with Biosolv®. Water based	Beer, candy, honey, syrup, liquor, water-based spots.
LGCS	<b>Liqua Gel.</b> Thickened solvent-based spotter reduces tendency to soak into carpet backing. Enhanced with Biosolv.	Asphalt, tar, oil, auto grease, bacon, gravy, fatty oils, gum, ink, liquor, latex paint (fresh), body oils, chewing gum.
